PROFILE

Software Engineer and PHP / Laravel developer based in Kathmandu, Nepal, building and maintaining live web applications since 2023 across e-commerce, banking and freelance client projects. Currently a Mid-Level PHP Developer at Parijat Infotech, building CakePHP APIs and webhook integrations for a Japanese e-commerce platform deployed on AWS. Comfortable across the stack with PHP, Laravel, CakePHP, CodeIgniter, JavaScript, SQL databases and Apache / Nginx servers.

API Design & Integration Webhooks Laravel & PHP Development Data Import / Export
AWS Deployment & Monitoring SQL Databases Bug Fixing & Feature Delivery

PROFESSIONAL EXPERIENCE

Mid-Level PHP Developer

2025 – Present

Parijat Infotech Pvt. Ltd. · Maharaajgunj, Kathmandu

- Maintain and enhance a Japanese e-commerce platform across frontend and backend, keeping daily operations running smoothly.
- Build and manage APIs with CakePHP, handling the full flow from inserting data to exporting it to other external APIs, ensuring reliable data flow and resolving API communication issues.
- Work on webhook design for integrations between the platform and external services.
- Deploy and monitor applications on AWS, supporting server management, troubleshooting and performance optimization.
- Ship feature updates and bug fixes across the system that improve user experience and keep the platform stable.
- Work with team members and stakeholders to clarify requirements, test changes and deliver updates on schedule.

Stack: PHP, CakePHP, REST API, Webhooks, JavaScript, jQuery, HTML, CSS, MS SQL, AWS, Apache, Nginx

Freelance Developer

2023 – Present

Self-employed · Kathmandu, Nepal

- Deliver marketing projects for clients, from logos, presentations and advertisements to frontend and backend development with Laravel.
- Manage up to 5 projects or tasks at a time under pressure.
- Consult with clients and recommend the most appropriate graphic design.
- Create 4+ design presentations and proposals a month for clients.

Stack: Laravel, Graphic Design

Junior PHP Developer

2024 – 2025

Jyoti Bikash Bank Limited · Kamalpokhari, Kathmandu

- Managed in-house banking applications built on CodeIgniter and SQL Server, keeping critical functionality running smoothly with timely updates.
- Designed and implemented new forms in the application, improving data entry processes and the user experience.
- Delivered successful project implementations across the bank's PHP and CodeIgniter stack.

Stack: PHP, CodeIgniter, JavaScript, jQuery, HTML, CSS, MS SQL, Windows Server, Apache, Nginx

Laravel Developer

2023 – 2024

Governance Automation Solution · KuponDol, Kathmandu

- Built new application development and design skills, contributing to a 25% increase in team productivity.
- Collaborated with the Instructional Design team to create innovative learning experiences, improving user engagement by 30%.
- Delivered successful project implementations with PHP, Laravel, JavaScript, REST APIs, AWS and SQL.
- Maintained and managed a Laravel application running on a live server.

Stack: PHP, Laravel, JavaScript, HTML, CSS, REST API, AWS, SQL
